

Get to the scene safer.

"Adequate lighting is critical to our job. These lights save lives. They prevent injuries and prevent crashes. They're probably the biggest safety device there is on the truck."

— Captain John Delain

"In the years we've been using J.W. Speaker lights they've been flawless—and that means zero maintenance costs. In my opinion the headlights are the best in the world."

— Fire Fighter Jeff Goetz

Because we all place a premium on safety, there's usually a premium placed on safety products. But J.W. Speaker headlights are different—in two major ways:

INCREASED SAFETY

Crisp white light and precise beam patterns put bright light where drivers need it—for better visibility and safer driving conditions. Rugged construction and long-lasting LEDs means never losing a light on a call.

LOWER COST OF OWNERSHIP

The price of Halogen headlights adds up over time—given the cost of multiple replacements. A single J.W. Speaker LED headlight has a lifespan equivalent to fifty halogen bulbs—resulting in major long-term savings. And as much as you'd be willing to pay for the peace-of-mind in knowing you've got the best, most reliable light in the world, we provide that free of charge.

Model 8630 Evolution & Model 8800 Evolution

MODEL 8630 EVOLUTION

- Direct Replacement for 5.75 " (PAR46) headlights
- Combined high and low beam functions
- Easy plug and play installation with Delphi wire connector
- Front position and DRL functions utilize a new outer ring at high intensities

MODEL 8800 EVOLUTION

- Plug and play replacement for 4 " x 6" 1A1 and 2A1 sealed beams.
- Optional dual mounting assembly is available in RH or LH 4 " x 6" LED headlight configurations
- UV-resistant polycarbonate lens
- Die-cast aluminum housing provides maximum protection

Better visibility, less fatigue

Bright white LED light improves visibility and is proven to keep drivers more alert

Lower cost of ownership

One J.W. Speaker LED headlight will last as long as 50 halogen headlights
