Volterra Intro • Demo Units Available

**Letter from the President**

*“When the best people you know are the very people you serve, there is only room for exceptional.” ~Mike DuFrane*

It’s Monday morning and the parking lot is busy with units and customers coming in. In these moments I am reminded of how thankful we are for your support. We don’t say thank you enough – know your decision to call **GLICK Fire** is one for which we’re incredibly thankful.

**Hot topic**

Delivery times for apparatus and parts have been at the forefront of our conversations this year, in this industry and others. Many times, we have little to no control over timing, and the patience you continue to show us is appreciated. In order to help ease the pain of long delivery times for ambulances and fire apparatus, we currently have multiple stock units available now and several others on order with shorter lead times. In addition, many of our manufacturers have a stock unit list showing the vehicles they have available. Check out page 9 to see a few of the ones listed. Contact us for more information on these units or any others.

**Get the parts you need**

Do you need to order parts, but don’t have the time to be on the phone, or it’s after hours? Check out our online parts store at [glickparts.com](http://glickparts.com) to order directly, or research parts using our photos and schematics.

**Coming on the horizon**

In the next few months, we will be showcasing the fire and EMS electric vehicles that are available to order.

The Pierce Volterra is now on the road and is scheduled to be in the NE region in September. I understand that these units may be appealing to a select group, but if you have any interest in seeing what the Volterra has to offer please check it out while it’s here. This is a ride and drive opportunity, and a chance to discuss the infrastructure. Once we have confirmation of the route, we will be scheduling stops in western and eastern PA. We hope to see you there!

We will have some exciting announcements in the coming months. Stay tuned and find out how we are expanding our services to you, to better serve your community.

Enjoy the rest of your summer, make memories, be safe, and be kind.

*Amy*

**Congratulations! Employee Years of Service ...**

# Welcome to our New Employees!

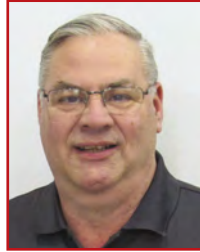

**NEIL CROMWELL**  
Upfit Technician • Bird In Hand

Neil was born and raised in Lancaster. In his free, time Neil enjoys hunting, fishing, and doing pyrotechnic displays for Schaefer Pyrotechnics! He is also a drag racer.

**TOM KAELIN**  
Service Writer • Harleysville

Tom is a retired Chief Petty Officer of the US Navy with 20-years of active service and currently resides in Souderton, PA with his wife of 42 years. He volunteers with Perseverance VFC of Souderton as a Life Member and Engineer. In his free time, he enjoys spending time at his family cabin in the Poconos, fishing, and snowmobiling.  
*tom.kaelin@glickfire.com*

**GREGG KUNKLE**  
Mobile PM Tech • Harleysville

Gregg is an 11-year Army Veteran and volunteer firefighter for Upper Salford VFC in Montgomery County. He has worked in the oil fields, as a country truck driver, local triaxle dump truck driver, and owned his own diesel performance shop specializing in diesel powered pickup trucks.  
*gregg.kunkle@glickfire.com*

**DYLAN MCKENRICK**  
Shop Apprentice • Bird In Hand

Dylan was born and raised in Shippensburg PA, and graduated from Franklin County CTC in 2023 from the Agricultural Mechanics program. He is currently a volunteer with South Newton VFC, and enjoys attending the Carlisle classic car and truck shows.

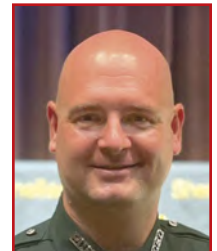

**KELLY MOYER**  
Fabrication Tech • Harleysville

Kelly grew up in the Vernfield area and attended North Montco Technical Career Center, with her home-school being Souderton Area High School. For the past 5 years Kelly has been a volunteer firefighter, and currently runs with Harleysville Community FC (station 89) and Upper Salford Volunteer FC (station 78). In her free time Kelly, has a hobby for every season: 4wheeling and camping in the summer, hunting deer and pheasant in the fall, skiing in the winter, and fishing in the spring.

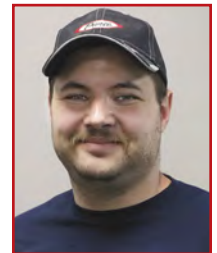

**BOB SCHIEBNER**  
Contract Manager • Bradenton FL

Bob worked as a part time and paid-on-call firefighter for various departments in Michigan and Wisconsin for 20-years and worked at Pierce for 15-years. He moved to St. Petersburg, FL, where he currently works nights as a Sheriff Deputy for the Pinellas County Sheriffs Office. He enjoys boating, beach days and exploring Florida.  
*robert.schiebner@glickfire.com*

**ZACH TAYLOR**  
Mobile PM Service Tech • Bird In Hand

Zach has 10-years of mechanical experience with all types of vehicles and equipment, as well as 5-years of driving fire trucks. In his free time, Zach can be found volunteering with Dover Township FD, golfing, riding motorcycle, camping, and racing.

# TAK-4 MAINTENANCE

In 2001, Pierce changed the industry by introducing TAK-4 Independent Front Suspension (IFS), engineered specifically for Pierce vehicles. Pierce now offers TAK-4 Independent Rear Suspension (IRS) which applies the same military grade performance to the rear for supreme ride performance. For maximum mobility, Pierce also delivers TAK-4 T3 system, which combines the advantages of TAK-4 IRS with a 100-percent mechanical rear steering system.

## PROVEN, PROPRIETARY, SEVERE-DUTY TECHNOLOGY.

Custom built for Pierce chassis, the TAK-4 Independent Suspension system maintains the feel of the road with outstanding steer-ability and a dramatically smoother ride over any surface. A tight steering system, torsion bar independent suspension and high-performance braking maximize control.

The TAK-4 design not only maximizes a truck's performance, it minimizes the wear and tear on your equipment and streamlines the maintenance process. There are no u-bolts on the front axle, no adjustments needed for the caster angle, and no need for lubricating the heavy-duty ball joints. Your rig spends less time in the shop and more time on the street.

## PREVENTATIVE MAINTENANCE

TAK-4 ride height should be inspected annually by a Pierce certified technician. Although the ride height is set at the factory, it should be inspected for wear or any changes that can occur when weight distribution is shifted in the unit. This is especially true when relocating equipment, or adding equipment to a truck.

Maintaining the correct ride height can help with proper tire wear, braking, and the overall drivability of the unit.

The TAK-4 evaluation process includes:

- Tire pressure and tread condition inspection
- Measurement of vehicle ride height
- Measurement of axle weights
- Adjustment if needed

## PIERCE® **VOLTERRA™** ELECTRIC VEHICLES

*Reduce emissions, minimize fuel and produce less noise with no compromise on apparatus features, performance, functionality and safety with an electric fire truck.*

The revolutionary **Pierce® Volterra™** platform of electric vehicles meets the needs of your fire department while providing the operational performance you expect from your apparatus.

Whether driving or pumping, the operational benefits of the distinct power source solution provide transparent vehicle operational characteristics to the firefighter.
